

Final International UAP Intelligence Dossier

Integrated U.S. and Foreign Government / Space Agency Source Catalog with Evidence Categories

Prepared: June 15, 2026 | Analytic posture: open-source intelligence, evidence-weighted, source-provenance first

1. Executive Intelligence Assessment

This final dossier consolidates the U.S.-centered PURSUE/AARO/DIA/AAWSAP/KONA BLUE assessment with an expanded international source catalog. The earlier assessment correctly resisted unsupported end-state claims such as a confirmed Alien Accord or confirmed alien species. The analysis is now broader and more useful: it recognizes that official UAP/UFO programs, archives, or investigative offices exist across multiple countries and that foreign case repositories should be evaluated alongside U.S. records.

Key judgment: Public records support a serious multi-country UAP investigation ecosystem, recurring unresolved cases, official medical/human-effects study in the U.S. AAWSAP corpus, and an official KONA BLUE record of retrieval/non-human-biologics allegations. They do not publicly prove recovered non-human craft, alien treaties, or verified biological entities.

Analytic upgrade from the conversation: The framework moved from claim checking to intelligence methodology: source provenance, program-chain reconstruction, medical-forensic extraction, physical-material validation, international comparison, and competing hypotheses.

2. Analytic Protocol Used

- Source provenance: distinguish official source, official-origin mirror, high-profile nonofficial report, media summary, and folklore/unsupported claim.
- Evidence hierarchy: physical specimen/lab record > chain-of-custody/logistics > official assessment > multi-sensor case > sworn testimony > firsthand report > hypnotic regression/media retelling.
- Category separation: human biological effects are not the same as non-human biologics; theoretical interdimensional physics is not proof of interdimensional beings.
- Alternative hypothesis testing: each case/source is scored against misidentification, atmospheric/plasma, terrestrial technology, foreign adversary, SAP/CAP, unknown natural phenomenon, and NHI hypotheses.
- Contamination controls: abduction, implant, and mummy/remains claims require stronger chain-of-custody and medical/forensic standards than aviation-sensor reports.
- International comparability: normalize country records by agency, archive type, case type, sensor type, medical/physical evidence, and official disposition.

3. Country and Source Catalog by Category

Country/Region	Sources cataloged	Official/official-origin entries	Primary categories
Argentina	1	1	Air force case-resolution program
Australia	1	1	Military/defense archive
Belgium	1	1	Radar-visual military case
Brazil	2	2	National archive; Primary record retrieval system
Canada	1	1	National archive
Chile	1	1	Civil aviation UAP office
European Union	1	1	Policy/detection capability

France	3	2	Case-level database; Civilian space agency UAP program; Foreign assessment
Japan	1	1	Defense reporting procedures
Mexico	1	1	Legislative hearing
New Zealand	2	2	Archive bibliographic record; Military/defense UFO files
Peru	1	1	Official unit
Russia / former USSR	1	0	Historical military-scientific program
Spain	1	1	Military declassified case files
United Kingdom	3	3	Archival methodology; Defense intelligence assessment; Military/intelligence archive
United States	12	12	Advanced aerospace program; Archival access; Compartmentation; ...
Uruguay	1	1	Air force UFO investigation commission

3.1 United States: PURSUE, AARO, DIA/AAWSAP, NASA, NARA

Country	Agency/Office	Source / report	Category	Assessment value	URL
United States	Department of War / ODNI	PURSUE UAP portal and tranche releases	Official disclosure portal; unresolved case archive	High for existence of official archive; low for NHI proof	https://www.war.gov/UFO/
United States	AARO	UAP Records / official records hub	Official UAP records; materials; historical review	High for official scope and negative/positive findings	https://www.aaro.mil/UAP-Records/
United States	AARO / DHS	History and Origin of KONA BLUE	Retrieval/biologics allegation; compartmentation	High for official recording of allegation; low for proof of biologics	https://www.aaro.mil/Portals/136/PDFs/UAP_RECORDS_RESEARCH/History_and_Origin_of_KONA_BLUE_FINAL_508.pdf
United States	DIA	AAWSAP solicitation / advanced aerospace technical scope	Advanced aerospace program; classified-capable contract	High for program existence and scope	https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/170057/
United States	DIA	AAWSAP/AATIP SAP request review memo	Compartmentation; SAP request	High for SAP-protection attempt	https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/170015/
United States	DIA / AAWSAP	DIRD 26 - Anomalous Acute and Subacute Field Effects on Human Biological Tissues	Medical/human effects; RF/microwave exposure	High for official medical-effects study	https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/237654/
United States	DIA / AAWSAP	DIRD - Metamaterials for Aerospace Applications	Materials science; cloaking; EM manipulation	High for technical scope; low for artifact proof	https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/237640/
United States	DIA / AAWSAP	DIRD - Warp Drive, Dark Energy and Manipulation of Extra Dimensions	Propulsion/theoretical physics	High for DIA interest; low for operational proof	https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/170050/
United States	DIA / AAWSAP	DIRD - Advanced Space Propulsion Based on Vacuum Spacetime Metric Engineering	Propulsion; metric engineering	High for conceptual overlap with UAP performance claims	https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/237647/
United States	AARO / ORNL	ORNL analysis of alleged anomalous metallic specimen	Physical material testing	High evidentiary value, negative result	https://www.aaro.mil/Portals/136/PDFs/Information%20Papers/ORNL_ANALYSIS_OF_A_N_ALUMINUM_SPECIMEN.pdf
United States	NASA	NASA UAP Independent Study Team final report	Scientific methodology; space agency role	High for scientific methodology	https://science.nasa.gov/wp-content/uploads/2023/09/uap-independent-study-team-final-report.pdf
United States	NARA	Records related to UFOs and UAPs	Archival access; historical records	High for archival provenance	https://www.archives.gov/research/topics/uaps

3.2 Europe: France, United Kingdom, Spain, Belgium, EU

Country	Agency/Office	Source / report	Category	Assessment value	URL
France	CNES / GEIPAN	GEIPAN official project page	Civilian space agency UAP program; public database	High for transparent official database	https://cnes.fr/en/projects/geipan
France	CNES / GEIPAN	GEIPAN case search database	Case-level database	High for structured public archive	https://www.cnes-geipan.fr/en/search/cas
France	COMETA authors (retired officials, not official state position)	COMETA Report	Foreign assessment; strategic interpretation	Medium for discourse; low as official proof	https://narcap.de/dokumente/COMETA-Report-englisch.pdf
United Kingdom	The National Archives / Ministry of Defence	UFO reports collection page	Military/intelligence archive	High for archive provenance	https://www.nationalarchives.gov.uk/explore-the-collection/explore-by-time-period/postwar/ufo-reports/
United Kingdom	The National Archives	UFO research guide	Archival methodology; record groups	High for archive guidance	https://www.nationalarchives.gov.uk/help-with-your-research/research-guides/ufos/
United Kingdom	Ministry of Defence / DI55	Project Condign - UAP in the UK Air Defence Region	Defense intelligence assessment; plasma hypothesis; physiological implications	High as official UK assessment	https://archive.org/details/condign-vol-2-1-258
Spain	Ministry of Defense / Spanish Air Force	Spanish UFO files 1962-1995 declassified collection	Military declassified case files	Medium-high for official-origin files	https://archive.org/details/SpanishUFOFiles
European Union	European Parliament / Commission context	EU Space Law and UAP detection question	Policy/detection capability; space governance	Medium for policy context	https://ebs.publicnow.com/view/C99F40BFF25E54A0220E42E06C6F1FE85752B283
Belgium	Belgian Air Force	Report concerning observation of UFOs, March 30-31, 1990	Radar-visual military case; F-16 intercept	Medium-high for case documentation	https://www.das-ufo-phaenomen.de/app/download/5789262574/Belgian_UFO_Report.pdf

3.3 Americas: Canada, Brazil, Chile, Argentina, Uruguay, Mexico, Peru

Country	Agency/Office	Source / report	Category	Assessment value	URL
Canada	Library and Archives Canada	Canada's UFOs: The search for the unknown	National archive; Project Magnet; federal records	High for archival provenance	https://www.canada.ca/en/library-archives/collection/research-help/science-technology/ufos.html
Brazil	Arquivo Nacional / Comando da Aeronáutica	Fundo OVNI official archive description	National archive; Air Force UFO records; Operation Prato context	High for official archive existence; individual records require validation	https://www.gov.br/arquivonacional/pt-br/canais_atendimento/imprensa/noticias/conheca-o-fundo-sobre-ovnis-do-arquivo-nacional
Brazil	Arquivo Nacional / SIAN	SIAN National Archive access portal	Primary record retrieval system	High for provenance	https://sian.an.gov.br/sianex/consulta/login.asp
Chile	DGAC / SEFAA (formerly CEFAA)	SEFAA official site	Civil aviation UAP office; resolved/unresolved cases	High for official office existence and current activity	https://sefaa.dgac.gob.cl/
Argentina	Fuerza Aérea Argentina / Centro de Identificación Aeroespacial	CIAE official page and annual case-resolution reports	Air force case-resolution program	High for official case-resolution model	https://www.argentina.gob.ar/fuerzaaerea/centro-de-identificacion-aeroespacial
Uruguay	Uruguayan Air Force / CRIDOVNI	CRIDOVNI reporting and 2026 U.S. cooperation reports	Air force UFO investigation commission; international cooperation	Medium for program existence; low until official documents obtained	https://www.montevideo.com.uy/Noticias/Uruguay-firmara-acuerdo-con-Estados-Unidos-para-investigar-ovnis-de-que-se-trata-uc953258
Mexico	Congress / public hearings	Mexican congressional UAP/mummy hearings	Legislative hearing; contested biological	Low as proof; high as public-disclosure event	https://apnews.com/article/

			claims		af7d54fabf3278ef83c39d899c457c76
Peru	Peruvian Air Force / DIFAA	DIFAA anomalous aerial phenomena unit references	Official unit; close-encounter/aviation cases	Low-medium pending primary source	https://nomanzone.com/news/ufo-uap/ufo-sightings-in-peru/

3.4 Asia-Pacific and Other: New Zealand, Australia, Japan, Russia/former USSR

Country	Agency/Office	Source / report	Category	Assessment value	URL
New Zealand	New Zealand Defence Force / Archives New Zealand	Declassified New Zealand UFO documents	Military/defense UFO files	Medium-high for official-origin files	https://ia801308.us.archive.org/26/items/NewZealandUFO/AIR-1630-2-Volume-1-1984-1989_text.pdf
New Zealand	National Library of New Zealand	UFO files item metadata	Archive bibliographic record	High for provenance	https://natlib.govt.nz/records/22979464
Australia	National Archives of Australia / Defence-related records	Australian UFO files collection	Military/defense archive; official-origin files	Medium-high for official-origin files	https://archive.org/details/AustralianUFOFiles
Japan	Ministry of Defense / Self-Defense Forces	Japan UAP reporting protocols and MOD public materials	Defense reporting procedures; airspace security	Medium pending direct protocol document	https://www.mod.go.jp/en/
Russia / former USSR	Soviet Academy / Ministry of Defense reported programs	Setka-AN / Setka-MO references	Historical military-scientific program; secondary source lane	Low until primary docs obtained	https://newspaceconomy.ca/2025/08/12/a-historical-timeline-of-government-approaches-to-ufo-uap-research/

4. Findings by Evidence Category

Official disclosure portal/database

Government-hosted or government-origin release portal with records or case lists

Analytic note: High provenance; item-level records still require individual scoring

- United States / Department of War / ODNI: PURSUE UAP portal and tranche releases | High for existence of official archive; low for NHI proof | <https://www.war.gov/UFO/>

- United States / AARO: UAP Records / official records hub | High for official scope and negative/positive findings | <https://www.aaro.mil/UAP-Records/>

- Australia / National Archives of Australia / Defence-related records: Australian UFO files collection | Medium-high for official-origin files | <https://archive.org/details/AustralianUFOFiles>

- Peru / Peruvian Air Force / DIFAA: DIFAA anomalous aerial phenomena unit references | Low-medium pending primary source | <https://nomanzone.com/news/ufo-uap/ufo-sightings-in-peru/>

Military/intelligence assessment

Defense/intelligence analysis of UAP threat, capability, or explanation

Analytic note: High when official; assess assumptions and classification context

- United Kingdom / The National Archives / Ministry of Defence: UFO reports collection page | High for archive provenance | <https://www.nationalarchives.gov.uk/explore-the-collection/explore-by-time-period/postwar/ufo-reports/>

- Spain / Ministry of Defense / Spanish Air Force: Spanish UFO files 1962-1995 declassified collection | Medium-high for official-origin files | <https://archive.org/details/SpanishUFOFiles>

- New Zealand / New Zealand Defence Force / Archives New Zealand: Declassified New Zealand UFO documents | Medium-high for official-origin files | https://ia801308.us.archive.org/26/items/NewZealandUFO/AIR-1630-2-Volume-1-1984-1989_text.pdf

- Australia / National Archives of Australia / Defence-related records: Australian UFO files collection | Medium-high for official-origin files | <https://archive.org/details/AustralianUFOFiles>
- Belgium / Belgian Air Force: Report concerning observation of UFOs, March 30-31, 1990 | Medium-high for case documentation | https://www.das-ufo-phaenomen.de/app/download/5789262574/Belgian_UFO_Report.pdf
- Russia / former USSR / Soviet Academy / Ministry of Defense reported programs: Setka-AN / Setka-MO references | Low until primary docs obtained | <https://newspaceconomy.ca/2025/08/12/a-historical-timeline-of-government-approaches-to-ufo-uap-research/>

Space agency scientific methodology

Scientific study/reporting guidance from NASA/CNES or similar agencies

Analytic note: High for method, not necessarily origin claims

- United States / DIA: AAWSAP solicitation / advanced aerospace technical scope | High for program existence and scope | <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/170057/>
- United States / NASA: NASA UAP Independent Study Team final report | High for scientific methodology | <https://science.nasa.gov/wp-content/uploads/2023/09/uap-independent-study-team-final-report.pdf>
- France / CNES / GEIPAN: GEIPAN official project page | High for transparent official database | <https://cnes.fr/en/projects/geipan>
- Japan / Ministry of Defense / Self-Defense Forces: Japan UAP reporting protocols and MOD public materials | Medium pending direct protocol document | <https://www.mod.go.jp/en/>
- European Union / European Parliament / Commission context: EU Space Law and UAP detection question | Medium for policy context | <https://ebs.publicnow.com/view/C99F40BFF25E54A0220E42E06C6F1FE85752B283>

Medical/human effects

Documents describing physiological injury, exposure, symptoms, or clinical analysis

Analytic note: High if objective records; distinguish human effects from non-human biologics

- United States / DIA / AAWSAP: DIRD 26 - Anomalous Acute and Subacute Field Effects on Human Biological Tissues | High for official medical-effects study | <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/237654/>

Physical material testing

Laboratory characterization of alleged anomalous material

Analytic note: Highest if chain of custody and methods are strong; negative results still important

- United States / AARO / ORNL: ORNL analysis of alleged anomalous metallic specimen | High evidentiary value, negative result | https://www.aaro.mil/Portals/136/PDFs/Information%20Papers/ORNL_ANALYSIS_OF_AN_ALUMINUM_SPECIMEN.pdf

Retrieval/biologics allegation

Officially recorded claim of recovered material/biologics without public specimen proof

Analytic note: Moderate as allegation; low as proof unless supported by custody/lab data

- United States / AARO / DHS: History and Origin of KONA BLUE | High for official recording of allegation; low for proof of biologics | https://www.aaro.mil/Portals/136/PDFs/UAP_RECORDS_RESEARCH/History_and_Origin_of_KONA_BLUE_FINAL_508.pdf
- Brazil / Arquivo Nacional / SIAN: SIAN National Archive access portal | High for provenance | <https://sian.an.gov.br/sianex/consulta/login.asp>

Civil aviation case investigation

DGAC/CAA/air-force offices that process pilot/ATC/radar reports

Analytic note: High for witness/sensor structure

- France / CNES / GEIPAN: GEIPAN official project page | High for transparent official database | <https://cnes.fr/en/projects/geipan>

- Chile / DGAC / SEFAA (formerly CEFAA): SEFAA official site | High for official office existence and current activity | <https://sefaa.dgac.gob.cl/>

Abduction/missing-time/implants

Close-encounter narratives with medical, psychological, or material claims

Analytic note: Low unless medically/objectively documented

Legislative/media disclosure event

Hearings/films/public communication that influence disclosure ecosystem

Analytic note: Contextual; not evidentiary unless primary documents produced

- Mexico / Congress / public hearings: Mexican congressional UAP/mummy hearings | Low as proof; high as public-disclosure event | <https://apnews.com/article/af7d54fabf3278ef83c39d899c457c76>

Alternative hypothesis source

Plasma, balloons, sensor artifacts, adversary tech, misidentification frameworks

Analytic note: Essential for red-team assessment

- United Kingdom / Ministry of Defence / DI55: Project Condign - UAP in the UK Air Defence Region | High as official UK assessment | <https://archive.org/details/condign-vol-2-1-258>

5. Medical and Biological Assessment

The strongest biological evidence lane remains human biological effects, not recovered non-human bodies. The U.S. DIRD 26 file is medically meaningful because it organizes symptoms, exposure mechanisms, latency, and inferred characteristics of anomalous aerospace systems. Brazil's Operation Prato/Colares archive is the highest-priority foreign comparator because its case tradition includes light-beam injury allegations and official Air Force documentation, but the official archive must be separated from leaked or third-party scans.

Non-human biologics: The strongest official record remains AARO's KONA BLUE paper, which records the allegation that the proposed DHS compartment related to retrieval/exploitation of non-human biologics. Publicly available records do not provide specimen inventory, pathology, DNA, chain-of-custody, or autopsy files.

Abduction/missing-time/implant claims: Include these only as a separate low-to-moderate confidence lane unless supported by objective medical records, imaging, recovered material with chain of custody, pathology, or independent witnesses. Hypnosis-only cases require contamination-risk flags.

6. Physical Materials and Laboratory Assessment

The ORNL/AARO specimen analysis is one of the most probative document types because it tests a physical artifact claim. The public result weakens the claim for that particular specimen by finding no unusual or unique material properties consistent with the alleged function. This is not a global refutation of all material claims; it establishes the correct standard: provenance, chain of custody, microscopy, spectroscopy, isotope ratios, and reproducible laboratory results.

7. International Pattern Findings

Institutionalization: France/GEIPAN, Chile/SEFAA, Argentina/CIAE, Canada/LAC, UK/National Archives, Brazil/Arquivo Nacional, and U.S. AARO/PURSUE show that UAP handling has been institutionalized in multiple countries.

Aviation/radar dominance: Most strong cases remain aviation, radar, pilot, air-defense, or civil aviation cases rather than entity cases.

Medical-effects lane: The U.S. DIRD 26 and Brazil/Colares-Prato materials are the strongest leads for medical comparison.

Theoretical physics lane: DIA AAWSAP DIRDs on metamaterials, metric engineering, warp drive, and wormholes show official study of extreme aerospace concepts but not recovered craft proof.

Negative evidence matters: AARO/ORNL material testing demonstrates that alleged anomalous materials can be tested and may return terrestrial results.

Foreign source caution: Some foreign collections are official-origin but accessed through mirrors; primary catalog URLs and original file references should be resolved before final evidentiary weighting.

8. Competing Hypotheses Matrix

Hypothesis	Description	Current assessment
H1 Misidentification/ordinary object	Aircraft, drones, balloons, celestial objects, satellites, reentry, hoaxes	Strongly supported for many resolved cases; weak for multi-sensor high-quality unexplained cases
H2 Atmospheric/plasma/natural phenomenon	Rare atmospheric plasma, weather, optical effects, ionospheric phenomena	Supported by UK Condign-style analysis for a subset; requires case-specific environmental data
H3 Advanced terrestrial technology	U.S., allied, or private advanced aerospace systems	Plausible for some military cases; constrained by performance, era, and location
H4 Foreign adversary technology	Adversary drones, ISR platforms, balloons, spoofing, hypersonics	Plausible in modern contested airspace; weaker for older high-performance cases
H5 Compartmented U.S./allied SAP/CAP	Hidden black programs misidentified by witnesses or shielded from ordinary oversight	Plausible for some; does not automatically imply NHI
H6 Unknown natural/physical phenomenon	New or poorly characterized physical phenomena affecting sensors/humans	Useful neutral category for unresolved cases
H7 Non-human intelligence	External intelligence, technology, or biologics of non-human origin	Not publicly proven; remains a low-confidence but not logically impossible hypothesis

9. Collection Requirements

- Resolve mirror-hosted foreign files to original government archive IDs whenever possible (Spain, Australia, Belgium, New Zealand).
- Download and OCR full GEIPAN unexplained Category D/D2 cases; build sensor/witness/medical fields.
- Retrieve Brazil Arquivo Nacional/SIAN OVNI fund records tied to Operation Prato and tag medical-injury allegations separately from press clippings.
- Extract UK Condign plasma/physiological sections and compare against DIRD 26 RF/microwave/EM exposure mechanisms.
- Download Argentina CIAE annual resolution reports and code official explanations versus residual unexplained cases.
- Locate direct Japanese MOD UAP reporting order/policy documents in Japanese-language MOD releases.
- Track any AARO-Uruguay CRIDOVNI cooperation agreement if formally published.
- For any abduction/implant/remains claim, require: chain of custody, radiology, pathology, DNA, isotopic/metallurgical analysis, independent lab replication, and contamination audit.

10. Final Analytic Judgment

This expanded international review does not convert UAP into proven NHI. It does show that UAP/UFO reporting is not a uniquely American phenomenon, nor a recent media artifact. Multiple governments and space/aviation agencies have created archives, offices, or studies to process anomalous aerial reports. The most defensible conclusion is that UAP represent a real intelligence, aviation-safety, scientific-data, and medical-effects collection problem with unresolved subsets across countries.

The highest-yield future inquiry is not broad belief or disbelief. It is targeted collection: (1) medical records and exposure modeling; (2) physical sample chain of custody and lab testing; (3) sensor-rich aviation cases; (4) compartmentation/program documents; and (5) international case normalization.

Appendix A - Complete Source Rows

United States - PURSUE UAP portal and tranche releases

Agency/office: Department of War / ODNI

Category: Official disclosure portal; unresolved case archive

Officiality: Official government

URL: <https://www.war.gov/UFO/>

Key contents: Government-wide review, declassification and public release of unresolved UAP-related records and historical documents; frames materials as unresolved, not alien-confirmed.

Analytic use: High for existence of official archive; low for NHI proof. Caveat: Records may be incomplete, redacted, and not fully analyzed; unresolved does not equal non-human.

United States - UAP Records / official records hub

Agency/office: AARO

Category: Official UAP records; materials; historical review

Officiality: Official government

URL: <https://www.aaro.mil/UAP-Records/>

Key contents: Central hub for AARO reports, KONA BLUE, ORNL materials testing, historical report, mission briefs, and reporting guides.

Analytic use: High for official scope and negative/positive findings. Caveat: AARO conclusions are official but debated; public record may not penetrate all compartments.

United States - History and Origin of KONA BLUE

Agency/office: AARO / DHS

Category: Retrieval/biologics allegation; compartmentation

Officiality: Official government

URL:

https://www.aaro.mil/Portals/136/PDFs/UAP_RECORDS_RESEARCH/History_and_Origin_of_KONA_BLUE_FINAL_508.pdf

Key contents: Multiple interviewees identified KONA BLUE as a proposed DHS compartment to protect retrieval/exploitation allegations, including “non-human biologics.” AARO states it was not approved, funded, or given materials.

Analytic use: High for official recording of allegation; low for proof of biologics. Caveat: AARO frames biologics as interviewee allegation, not verified possession.

United States - AAWSAP solicitation / advanced aerospace technical scope

Agency/office: DIA

Category: Advanced aerospace program; classified-capable contract

Officiality: Official government

URL: <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/170057/>

Key contents: DIA solicited advanced aerospace studies in lift, propulsion, control, power, materials, spatial/temporal translation, signatures, and human effects; required clearable personnel and possible TS/SCI.

Analytic use: High for program existence and scope. Caveat: Technical forecasting does not prove reverse engineering.

United States - AAWSAP/AATIP SAP request review memo

Agency/office: DIA

Category: Compartmentation; SAP request

Officiality: Official government

URL: <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/170015/>

Key contents: DIA considered a restricted SAP request tied to AAWSAP/AATIP but determined justification was inadequate based on deliverables.

Analytic use: High for SAP-protection attempt. Caveat: Rejected SAP does not prove or disprove hidden legacy compartments elsewhere.

United States - DIRD 26 - Anomalous Acute and Subacute Field Effects on Human Biological Tissues

Agency/office: DIA / AAWSAP

Category: Medical/human effects; RF/microwave exposure

Officiality: Official government

URL: <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/237654/>

Key contents: Examines human injury patterns allegedly associated with anomalous aerospace exposure; symptoms include dermatologic, neurologic, ocular, hematologic, and radiation-like findings.

Analytic use: High for official medical-effects study. Caveat: Case provenance and independent medical records require validation.

United States - DIRD - Metamaterials for Aerospace Applications

Agency/office: DIA / AAWSAP

Category: Materials science; cloaking; EM manipulation

Officiality: Official government

URL: <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/237640/>

Key contents: Reviews artificial materials with properties not found naturally, including negative refractive index and electromagnetic applications.

Analytic use: High for technical scope; low for artifact proof. Caveat: Reads as conventional advanced materials forecasting.

United States - DIRD - Warp Drive, Dark Energy and Manipulation of Extra Dimensions

Agency/office: DIA / AAWSAP

Category: Propulsion/theoretical physics

Officiality: Official government

URL: <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/170050/>

Key contents: Explores warp metrics, dark energy, quantum vacuum, and higher-dimensional concepts.

Analytic use: High for DIA interest; low for operational proof. Caveat: Speculative physics does not equal interdimensional beings.

United States - DIRD - Advanced Space Propulsion Based on Vacuum Spacetime Metric Engineering

Agency/office: DIA / AAWSAP

Category: Propulsion; metric engineering

Officiality: Official government

URL: <https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/237647/>

Key contents: Discusses altered spacetime metrics and potential effects on light velocity, mass, frequency, gravity/antigravity.

Analytic use: High for conceptual overlap with UAP performance claims. Caveat: No chain from observation to hardware.

United States - ORNL analysis of alleged anomalous metallic specimen

Agency/office: AARO / ORNL

Category: Physical material testing

Officiality: Official government/lab

URL:

https://www.aaro.mil/Portals/136/PDFs/Information%20Papers/ORNL_ANALYSIS_OF_AN_ALUMINUM_SPECIMEN.pdf

Key contents: ORNL tested alleged anomalous material; public conclusion supports terrestrial/manufactured origin and lacks unusual properties.

Analytic use: High evidentiary value, negative result. Caveat: One sample does not resolve other material claims; chain of custody still critical.

United States - NASA UAP Independent Study Team final report

Agency/office: NASA

Category: Scientific methodology; space agency role

Officiality: Official government/space agency

URL: <https://science.nasa.gov/wp-content/uploads/2023/09/uap-independent-study-team-final-report.pdf>

Key contents: Calls UAP a scientific opportunity requiring rigorous evidence, systematic data collection, standardized reporting, and stigma reduction.

Analytic use: High for scientific methodology. Caveat: NASA did not claim extraterrestrial origin.

United States - Records related to UFOs and UAPs

Agency/office: NARA

Category: Archival access; historical records

Officiality: Official government archive

URL: <https://www.archives.gov/research/topics/uaps>

Key contents: NARA identifies numerous record groups and collections related to UFO/UAP research, with downloadable catalog records.

Analytic use: High for archival provenance. Caveat: Indexing and access completeness vary.

France - GEIPAN official project page

Agency/office: CNES / GEIPAN

Category: Civilian space agency UAP program; public database

Officiality: Official government/space agency

URL: <https://cnes.fr/en/projects/geipan>

Key contents: GEIPAN collects, analyzes, archives, and informs the public about UAP; CNES reports a small percentage remain unexplained after investigation.

Analytic use: High for transparent official database. Caveat: Civilian investigation; cases require individual review.

France - GEIPAN case search database

Agency/office: CNES / GEIPAN

Category: Case-level database

Officiality: Official government/space agency

URL: <https://www.cnes-geipan.fr/en/search/cas>

Key contents: Public searchable case list with classifications and updates.

Analytic use: High for structured public archive. Caveat: French-language records may require translation; classification changed over time.

France - COMETA Report

Agency/office: COMETA authors (retired officials, not official state position)

Category: Foreign assessment; strategic interpretation

Officiality: Nonofficial but high-profile

URL: <https://narcap.de/dokumente/COMETA-Report-englisch.pdf>

Key contents: Argues extraterrestrial hypothesis is plausible for a subset of cases; influential in foreign UAP discourse.

Analytic use: Medium for discourse; low as official proof. Caveat: Not an official French government conclusion.

United Kingdom - UFO reports collection page

Agency/office: The National Archives / Ministry of Defence

Category: Military/intelligence archive

Officiality: Official government archive

URL: <https://www.nationalarchives.gov.uk/explore-the-collection/explore-by-time-period/postwar/ufo-reports/>

Key contents: UK MoD kept UFO records since the 1960s; many are now held at The National Archives.

Analytic use: High for archive provenance. Caveat: Some early files destroyed under records policy.

United Kingdom - UFO research guide

Agency/office: The National Archives

Category: Archival methodology; record groups

Officiality: Official government archive

URL: <https://www.nationalarchives.gov.uk/help-with-your-research/research-guides/ufos/>

Key contents: Explains UK terminology, archival history, file destruction before 1967, and online records.

Analytic use: High for archive guidance. Caveat: Guide, not an assessment.

United Kingdom - Project Condign - UAP in the UK Air Defence Region

Agency/office: Ministry of Defence / DI55

Category: Defense intelligence assessment; plasma hypothesis; physiological implications

Officiality: Official government, mirror/public release

URL: <https://archive.org/details/condign-vol-2-1-258>

Key contents: Assessed UAP reports for defense value and proposed rare atmospheric plasma explanations for some events; useful alternative hypothesis to NHI.

Analytic use: High as official UK assessment. Caveat: Release mirrored outside official MoD site; explanation remains contested.

Canada - Canada's UFOs: The search for the unknown

Agency/office: Library and Archives Canada

Category: National archive; Project Magnet; federal records

Officiality: Official government archive

URL: <https://www.canada.ca/en/library-archives/collection/research-help/science-technology/ufos.html>

Key contents: LAC collection includes records from National Defence, Transport, National Research Council, and RCMP.

Analytic use: High for archival provenance. Caveat: Case quality varies; many are reports/correspondence.

Brazil - Fundo OVNI official archive description

Agency/office: Arquivo Nacional / Comando da Aeronáutica

Category: National archive; Air Force UFO records; Operation Prato context

Officiality: Official government archive

URL: https://www.gov.br/arquivonacional/pt-br/canais_atendimento/imprensa/noticias/conheca-o-fundo-sobre-ovnis-do-arquivo-nacional

Key contents: Brazilian National Archive states the OVNI fund was produced by Air Force Command and includes 743 records: reports, questionnaires, correspondence, photos, drawings, videos, audio, and press clippings.

Analytic use: High for official archive existence; individual records require validation. Caveat: Some widely circulated Operation Prato records are leaks or third-party scans; distinguish official archive from leaked corpus.

Brazil - SIAN National Archive access portal

Agency/office: Arquivo Nacional / SIAN

Category: Primary record retrieval system

Officiality: Official government archive

URL: <https://sian.an.gov.br/sianex/consulta/login.asp>

Key contents: Official access path for Brazilian archival records, including OVNI fund material.

Analytic use: High for provenance. Caveat: Requires account/search; direct file IDs must be retrieved separately.

Chile - SEFAA official site

Agency/office: DGAC / SEFAA (formerly CEFAA)

Category: Civil aviation UAP office; resolved/unresolved cases

Officiality: Official government/civil aviation

URL: <https://sefaa.dgac.gob.cl/>

Key contents: SEFAA is Chile's anomalous aerial phenomena study section under DGAC; publishes case updates and institutional materials.

Analytic use: High for official office existence and current activity. Caveat: Case pages require extraction/translation.

Argentina - CIAE official page and annual case-resolution reports

Agency/office: Fuerza Aérea Argentina / Centro de Identificación Aeroespacial

Category: Air force case-resolution program

Officiality: Official government/military

URL: <https://www.argentina.gob.ar/fuerzaaerea/centro-de-identificacion-aeroespacial>

Key contents: CIAE organizes, coordinates, and executes investigation/analysis of aerospace events and publishes annual resolution reports.

Analytic use: High for official case-resolution model. Caveat: Most cases appear resolved; need review of unexplained subset.

Spain - Spanish UFO files 1962-1995 declassified collection

Agency/office: Ministry of Defense / Spanish Air Force

Category: Military declassified case files

Officiality: Official-origin files; third-party mirror

URL: <https://archive.org/details/SpanishUFOFiles>

Key contents: Reports on UFO sightings compiled by the Spanish Air Force and declassified during the 1990s.

Analytic use: Medium-high for official-origin files. Caveat: Use original Ministry file references where possible; archive mirror not same as official portal.

New Zealand - Declassified New Zealand UFO documents

Agency/office: New Zealand Defence Force / Archives New Zealand

Category: Military/defense UFO files

Officiality: Official-origin files; archive mirror/National Library metadata

URL: https://ia801308.us.archive.org/26/items/NewZealandUFO/AIR-1630-2-Volume-1-1984-1989_text.pdf

Key contents: Files state copied/redacted correspondence on UFOs from 1952 to 2009 was declassified and released under the Official Information Act.

Analytic use: Medium-high for official-origin files. Caveat: Originals restricted for privacy until 2080; public copies redacted.

New Zealand - UFO files item metadata

Agency/office: National Library of New Zealand

Category: Archive bibliographic record

Officiality: Official national library metadata

URL: <https://natlib.govt.nz/records/22979464>

Key contents: Bibliographic record for copied UFO files released to the public by New Zealand Defence Force.

Analytic use: High for provenance. Caveat: May not contain full text; links to records needed.

Australia - Australian UFO files collection

Agency/office: National Archives of Australia / Defence-related records

Category: Military/defense archive; official-origin files

Officiality: Official-origin records; third-party mirror

URL: <https://archive.org/details/AustralianUFOFiles>

Key contents: Collection includes National Archives file numbers and scanned Australian government UFO records.

Analytic use: Medium-high for official-origin files. Caveat: Prefer NAA catalog item URLs for final provenance; mirror is useful for OCR.

Uruguay - CRIDOVNI reporting and 2026 U.S. cooperation reports

Agency/office: Uruguayan Air Force / CRIDOVNI

Category: Air force UFO investigation commission; international cooperation

Officiality: Official body referenced through media

URL: <https://www.montevideo.com.uy/Noticias/Uruguay-firmara-acuerdo-con-Estados-Unidos-para-investigar-ovnis-de-que-se-trata-uc953258>

Key contents: CRIDOVNI, under Uruguayan Air Force, reportedly prepared a cooperation agreement with AARO.

Analytic use: Medium for program existence; low until official documents obtained. Caveat: Need primary FAU/CRIDOVNI source docs.

Japan - Japan UAP reporting protocols and MOD public materials

Agency/office: Ministry of Defense / Self-Defense Forces

Category: Defense reporting procedures; airspace security

Officiality: Official policy context; direct docs need confirmation

URL: <https://www.mod.go.jp/en/>

Key contents: Japan MOD is the official defense source; reporting protocols for unidentified aerial objects have been reported since 2020.

Analytic use: Medium pending direct protocol document. Caveat: Need direct MOD order/guideline URL, not only summaries.

Mexico - Mexican congressional UAP/mummy hearings

Agency/office: Congress / public hearings

Category: Legislative hearing; contested biological claims

Officiality: Official venue, not official validation

URL: <https://apnews.com/article/af7d54fabf3278ef83c39d899c457c76>

Key contents: Mexican congressional hearings allowed presentation of alleged non-human mummies; scientists and officials strongly challenged claims and Congress did not verify alien origin.

Analytic use: Low as proof; high as public-disclosure event. Caveat: Major contamination/fraud concerns; not a validated government finding.

European Union - EU Space Law and UAP detection question

Agency/office: European Parliament / Commission context

Category: Policy/detection capability; space governance

Officiality: Official parliamentary/public record via publicnow mirror

URL: <https://ebs.publicnow.com/view/C99F40BFF25E54A0220E42E06C6F1FE85752B283>

Key contents: European parliamentary discussion frames UAP partly in detection/near-Earth-space object awareness; no dedicated EU UAP program proven.

Analytic use: Medium for policy context. Caveat: Question/answer context; not a case archive.

Belgium - Report concerning observation of UFOs, March 30-31, 1990

Agency/office: Belgian Air Force

Category: Radar-visual military case; F-16 intercept

Officiality: Official-origin report; mirror

URL: https://www.das-ufo-phaenomen.de/app/download/5789262574/Belgian_UFO_Report.pdf

Key contents: Summarizes air force unit and gendarmerie reports; two F-16s scrambled to identify unknown phenomena.

Analytic use: Medium-high for case documentation. Caveat: Need original Belgian defense archive source; famous photo later hoax is separate and should not contaminate radar case.

Peru - DIFAA anomalous aerial phenomena unit references

Agency/office: Peruvian Air Force / DIFAA

Category: Official unit; close-encounter/aviation cases

Officiality: Official body referenced; source trail incomplete

URL: <https://nomanzone.com/news/ufo-uap/ufo-sightings-in-peru/>

Key contents: Peruvian Air Force has been reported to maintain/reactivate DIFAA for anomalous aerial phenomena.

Analytic use: Low-medium pending primary source. Caveat: Need official FAP documents and avoid conflating with Maussan/Nazca mummy claims.

Russia / former USSR - Setka-AN / Setka-MO references

Agency/office: Soviet Academy / Ministry of Defense reported programs

Category: Historical military-scientific program; secondary source lane

Officiality: Secondary; primary Russian documents not yet verified

URL: <https://newspaceconomy.ca/2025/08/12/a-historical-timeline-of-government-approaches-to-ufo-uap-research/>

Key contents: Reports describe coordinated scientific/defense cells for unusual observations; relevant for international comparison but primary docs needed.

Analytic use: Low until primary docs obtained. Caveat: High translation/provenance risk; do not over-weight.
